Snow forecast - Sunday 10 February 2013

There's another rather cold week in store for the Alps with further snow in places. However, the snow won't be as widespread as it was last week.

Detailed forecast:

Austria

Monday will be mostly dry with some sunshine, particularly in the northern Alps. Cloud may thicken up in the far south later with the chance of some overnight snow close to the Italian border. **Tuesday** will be cloudier with a few snow flurries here and there, heaviest in the far south-eastern Alps.

It will remain mostly cloudy on **Wednesday** with further snow flurries, particularly in the east. A few snow flurries may persist in the east on **Thursday**, but most regions will brighten up with plenty of sunshine further west.

Sunny in Lech - Photo: www.skiarlb.org.at

France

Monday will be mostly cloudy with further snow for the southern Alps. Some snow will also get through to the northern Alps, especially later in the day. On **Tuesday** it should brighten up in the southern Alps. Further north some snow flurries may persist, but here too it should brighten up later in the day.

Wednesday should be mostly dry, cold and bright with just the odd isolated snow flurry. **Thursday** is expected to be cold and sunny everywhere.

Cold but dry in Les Saissies in the northern French Alps on Sunday afternoon - Photo: www.lessaisies.com

Italy

Monday will be mostly cloudy with snow for many resorts, heaviest in the east (Dolomites) later in the day. On **Tuesday** some snow flurries may persist in the eastern Italian Alps but western regions are expected to be mostly dry with some sunshine.

On **Wednesday** some snow showers may return to the south-western Alps (**Sestriere** southwards). There may also be some flurries in the Dolomites, otherwise most other regions will be dry with sunny spells. **Thursday** is expected to be dry and bright across all regions.

Clouding over in the Monterosa region late on Sunday with some overnight snow expected - Photo: www.regione.vda.it

Switzerland

Monday will be mostly cloudy with the best of any brightness in the northern Alps. There will also be a scattering of snow showers, heaviest and most persistent in the far south, close to the Italian border. Further snow flurries are possible almost anywhere on **Tuesday**, but bright or sunny spells are also expected and some places will stay dry.

On **Wednesday** many places will be dry with sunny spells but a few snow flurries are still possible here and there, especially in the east. **Thursday** should be dry and bright everywhere.

Outlook:

The end of the week and weekend looks mostly dry and fine, but still rather chilly for most regions.

Next detailed snow forecast will be on Thursday 14 February, but see [Today in the Alps](#) for daily updates
