Snow forecast - Monday 30 December 2013

High pressure is firmly in charge of the Alps today, but will gradually lose its influence as the week progresses. This means plenty of fine weather on Monday and Tuesday but a gradual deterioration from Wednesday onwards.

Many resorts will see at least some snow later in the week, but it won't be particularly cold so some rain is also possible at low altitude. Heavier and more widespread snow is likely next weekend.

Detailed forecast:

Austria

Monday, Tuesday and **Wednesday** will be mostly dry and sunny with just a little cloud here and there. **Thursday** is likely to be cloudier with a few scattered showers and a little snow above 1200-1400m in the west, 500-900m further south and east.

Glorious weather across most of the Alps today. This is Hintertux - Photo: foto-webcam.eu

France

Monday and **Tuesday** will be mostly fine with just some high cloud drifting around from time to time. **Wednesday** may see some thicker cloud, particularly early on, with a few showers possible (snow above 1000m). On **Thursday**, showers are likely to become more widespread with some snow above about 1400m.

Blue skies in Alpe d'Huez today - Photo: alpedhuez.com

Italy

The Italian Alps will be dry and mostly sunny on **Monday** and **Tuesday**. On **Wednesday** it should stay dry in the eastern Italian Alps, but a few showers (snow above 1000m) cannot be ruled out further west. **Thursday** is likely to see more general cloud cover and widespread showers (snow 1200-1500m).

Switzerland

Monday and **Tuesday** will be mostly fine with plenty of sunshine and just a little cloud here and there. Wednesday is likely to start cloudy with a few showers (snow around 1000m) but some places will stay dry and it should brighten up everywhere later. On **Thursday**, more widespread showers are forecast with some snow above 1200-1400m.

Outlook:

It will remain unsettled with the prospect of some significant snow in all regions over the weekend.

Next detailed snow forecast will be on Friday 3 January 2014, but see [Today in the Alps](#) for daily updates
