Latest snow forecast

Updated: 3.15pm Tuesday 22 April 2014

The weather remains changeable over the next few days, with sunny spells but also a scattering of showers, most frequent along the northern edge of the Alps (at least at first).

Later in the week and over the weekend the showers will become heavier and more widespread, with some significant snow in places.

Detailed forecast:

Austria

Wednesday will begin mostly dry with sunny spells, but cloud will bubble up to bring a scattering of afternoon showers (snow 2000-2200m), heaviest in the north-eastern Alps.

Little change is expected on **Thursday** and **Friday**, with sunny spells and scattered showers (snow 2000-2200m) again most frequent in the northern Alps.

France

Wednesday will begin mostly dry with sunny spells, but showers will break out later in the day with a dusting of snow in places above 2300m. **Thursday** will be similar but with rather more frequent showers in the northern Alps in the afternoon (snow 2300m).

On **Friday**, a more persistent spell of rain is likely with snow above 2000m, perhaps a bit lower later.

Italy

Wednesday and **Thursday** will be mostly dry with sunny spells in the eastern Italian Alps. However one or two afternoon showers are possible in the western Alps (snow 2200m).

On **Friday** the shower risk increases, particularly in the west, with a little snow above 2000-2200m in places.

Changeable conditions this week in the Alps. This is Livigno.

Wednesday and **Thursday** will begin mostly sunny, but clouds will bubble up later in the day to bring one or two showers, mostly close to the northern edge of the Alps (snow 2200m).

On **Friday** some more organised precipitation is likely to spread from the west as the day progresses, with snow above 2000m, perhaps lower later. The far east may stay bright for most of the day.

Outlook:

Remaining changeable over the weekend with further showers or longer spells of rain and some significant snow in places - mostly above 2000m - but perhaps lower for a time too.

This is our last detailed snow forecast for the 2013-14 season. Detailed forecasts for the 2014-15 season will begin in October.

We will continue to provide occasional updates on weather and snow conditions over the Summer...
