### Latest snow forecast

**Updated: 2pm Friday 15 January 2016**

Cold air is now firmly entrenched across the Alps, and will remain so until early next week, at the very least.

The southern half of the Alps will remain mostly dry and sunny over the next few days, but further snow showers will affect the north at times, becoming increasingly confined to eastern Switzerland and Austria by Sunday.

Between now and Sunday we can expect another 10-30cm in many northern parts of the Alps, with 40cm+ in some of the more favoured spots, such as the Austrian Vorarlberg. What's more, the snow will fall at all levels, so it will feel decidedly wintry in the northern Alps, even in the lowest valleys.

---

### Detailed forecast:

#### Austria

The rest of **Friday** will be rather cloudy with snow flurries to low levels, heaviest in the north. The far south should stay dry with occasional bright spells.

**Saturday** and **Sunday** will see further snow showers to all levels across the northern and western Austrian Alps, while the far south again escapes with two mostly dry days.

**Monday** will see any snow flurries confined to the far north-eastern Austrian Alps. Elsewhere it will be mostly dry with plenty of sunshine, but still cold.

Sunny this morning on the Mölltal glacier, where only a dusting of snow is expected over the next few days - Photo: gletscher.co.at

---

#### France

The rest of **Friday** will see lots of sunshine in the south, but variable cloud in the far north with some snow flurries (to low levels) arriving late in the day, and persisting into the night.

**Saturday** will be cold with early snow flurries in the northern Alps, probably dying away later. The best of any sunshine will be in the south.

**Sunday** will feel colder still with a raw north-easterly wind. Most places should be dry, with the best of any sunshine again in the south. Further north there may be more cloud at times, especially early in the day with just the odd isolated flurry.

**Monday** is expected to be fine but cold.

Sunny earlier today in the Portes du Soleil, but snow flurries are expected this evening. This is La Chapelle d'Abondance - Photo: lachapelle74.com

**Italy**

The rest of **Friday** will be mostly dry with sunny spells, but some snow flurries will affect the north-western Italian Alps during the night.

**Saturday** will see a few snow flurries close to the border areas, but most areas will be dry, if cold, with variable cloud and sunny spells.

It will remain cold but mostly fine on **Sunday**, with just the odd snow flurry close to the Austrian border.

**Monday** should be sunny, but cold, everywhere.

**Switzerland**

The rest of **Friday** will see sunny spells but it will become increasingly cloudy in the north, with snow flurries to low altitude later on, lasting into the night.

**Saturday** will be cold with further snow flurries at times, mostly across the northern half of the Swiss Alps, with the best of any sunshine in the south.

On **Sunday**, any snow flurries in the north-west will die away, but they will linger all day in the north-east. The south will be brighter, but it will be very cold everywhere.

**Monday** should be fine but cold.

---

### **Outlook:**

The weather for the rest of next week is very uncertain but, it looks like it will start cold, but gradually turn milder.

Not much new snow is expected at this stage but, with so much volatility in the weather models right now, this could change. Stay tuned...
