### Latest snow forecast

**Updated: 7pm Friday 26 January 2018**

The south-western Alps saw some snow today, but it will clear tomorrow to leave all areas with several days of mostly fine and quite mild weather.

This settled spell will last until the middle of next week, at which point a new storm will arrive from the north-west. It is, however, too early to say how potent the new storm will be, or which side of the Alps it will favour most.

### Detailed forecast:

#### Austria

**Saturday** will be dry in the Austrian Alps, with plenty of sunshine above any low cloud/fog patches. Freezing levels will be between 1500m and 2200m.

It will remain dry on **Sunday**, though there may be more cloud drifting around. Temperatures will be similar to those of Saturday.

**Monday** should see wall-to-wall sunshine, at least at altitude, with freezing levels between 1500m and 2300m.

Sunny this afternoon in St Anton, with more to come over the next few days – 26 January 2018 – Photo: facebook.com/St,Anton

---

#### France

On **Saturday**, any early snow showers (1100m) in the border areas between the southern French Alps and Italy will quickly die away. Most places will then brighten up with plenty of sunshine by the afternoon, with freezing levels close to 2000m in most resorts.

**Sunday** and **Monday** will be mostly sunny above any low cloud/fog patches, with freezing levels between 2300m and 2700m.

Got a burning question about weather or snow conditions in the Alps?

Foggy this afternoon in Châtel, but it should brighten up tomorrow – 26 January 2018 – Photo: chatel.com

### Italy

**Saturday** will see some early flurries (1100m) in the western Italian Alps die out, with sunny spells developing later in the day. Further east it should be sunny from the word go, with freezing levels close to 1800m.

**Sunday and Monday** will then be mostly sunny with freezing levels between 1800m and 2600m.

### Switzerland

**Saturday** will see a few early flurries (1100m) die away from the south-western Swiss Alps, with sunny spells then developing. Elsewhere it will be mostly sunny all day with freezing levels close to 2000m.

**Sunday and Monday** will remain mostly sunny above any low level cloud/fog patches, with freezing levels between 2000m and 2500m.

### Outlook:

**Tuesday** will be mostly fine but **Wednesday** will see the arrival of a new storm from the north-west.

The exact track and potency of this storm is still unclear but it seems likely that the western Alps are most likely to benefit from some moderate falls of snow. Stay tuned!

**Our next detailed snow forecast will be on Tuesday 30 January 2018, but see [Today in the Alps](#) for daily updates**
